

# COKE VIETNAM SHOWROOM 2023

August 2023

# Why Link?

**Client first,  
always**

Forward-thinking brands are demanding more from their procurement partnerships. Our proactive mindset, agile approach and desire to share knowledge, mean we put our clients at the heart of everything we do.

**Distinctly  
dependable**

Privately owned, profitable and a proven track record for exceeding expectations. 20+ years of improving efficiencies, driving sales, enhancing a brand's reputation – our clients trust us to always find the best way.

**An eye on  
the future**

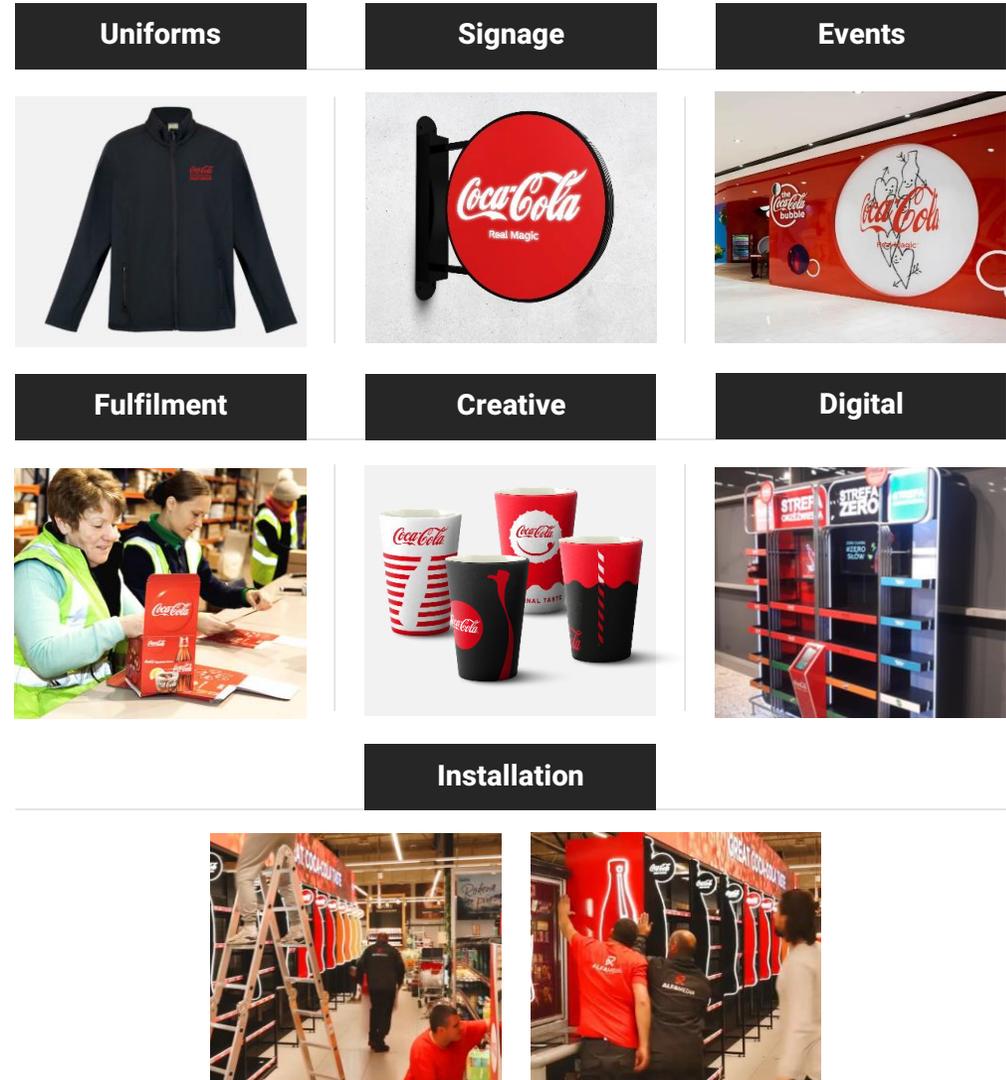

Technology, materials and consumer trends are constantly evolving. In our rapidly changing industry, we need to stay ahead of the game if we want to remain relevant. By staying future facing and forward thinking, every change we make for our clients is a step in the right direction.

**A force  
for better**

Global climate change is one of the greatest challenges we all face today. Ours is an inherently wasteful industry, but the potential for positive change is there and we have a responsibility to lead it.

## Coca-cola Light Up Glass

Taking inspiration from brands such as Budweiser and Heineken, for the next World Cup why not create a stadium cup that lights up when your favorite team scores or lights up through the sound of cheering.

The cup is 500ml in size with LED base which could glow brighter dependent on sound level.

MOQ for this type of development would be approx. 30,000 units

## Coca-cola Feel Cup

### THERMOSENSITIVE COLOR CHANGING CUPS

As the name indicates FEELCUP® intelligent glasses are glasses that "feel" (thermo-sensitive color changing cups). Thanks to a revolutionary printing system they are able to indicate whether the temperature of the liquid it contains has reached its optimal temperature for consumption, for both cold and hot liquids. The container can be adapted to the desired temperature level.

Thanks to its thermo-chromatic reaction the right temperature is indicated by means of a change in color, visualization of a message, a text or either a company or brand logo. This action allows a large number of advertising impacts and offers many innovative possibilities for whatever promotional campaign, especially those related to beverages and/or liquids.

# INNOVATION

## Coca-cola Holographic App

Similar to Augmented Reality you use an APP to make the hologram on the Coca-Cola Contour Glass. This technology is available for glassware but currently developed further for plastic

Scan the QR Code on the back of the box with the app

Insert the phone playing the video on the side box socket

## Coca-cola Red Zone Smart Glass

The "RED ZONE" refresher is a 20 ounce lucite collector's glass with LED illumination as well as "CHIRP" Technology. The glass features an LED screen that will display touchdowns, field goals, extra points, game scores and time. It will connect to an app that sends info to the SMART-GLASS.

When a team enters the Red Zone, the glass will slowly blink...If they score it will fully illuminate! Great interactivity at the stadium as well as at home or from your favorite Sunday spot.

## COCA-COLA HOME LOYALTY PROGRAMME

Coca-Cola wants the customer to live with the brand. Create a premium perception and also better home decorations. ASL proposes a variety of premium (retail quality) items for their channel promotion in supermarkets. This programme has been so successful that we are coming up to our 3rd reorder. Market: Hong Kong.

## Sustainability

### Overview

- ASL identified an opportunity to implement a programme to remove single use plastic from Premia products
- This process was developed and integrated into the day-to-day workflow in order for the ASL teams to offer sustainable alternatives to stakeholders on a job-by-job basis

### Solution

- The process has been running for over 12 months and is bedded into the ASL process for all items
- For every item that would have historically required a polybag as a natural choice, alternatives are offered
- Labels can be created to go onto the product packaging with key messages

### Benefits

- The change in offering has been a huge success that has seen a **68%** reduction in single use plastic over the last 12 months
- The reporting is now directly embedded in the ASL MI
- Local Opco's are fully supporting of the initiative and working with ASL to ensure alternatives are achievable
- The target is now to hit **100% elimination of polybags** from our offering

**The same process is now being rolled out across the Coca-Cola network.**

## ENVIRONMENTAL STATISTICS

- On average plastic bags are used for only 20 minutes yet take 400 years to completely decompose! Reusable bags can be used over 100 times and are recyclable material.
- 14 Plastic bags contain enough petroleum to drive a car 1 kilometre.
- 12 million barrels of oil are needed to produce the amount the plastic bags consumed in the EU annually.
- Annually an estimated 4 billion plastic bags become litter worldwide!
- At least 8 million tons of plastic enter the oceans each year – that's equivalent to a

- garbage truck entering the ocean every minute!
- There is micro plastic in the ocean than there are stars in the Milky Way!
- 60 - 90 % of marine litter is plastic based
- More than 50% of sea turtles have consumed plastic.
- If current practices continue, plastic input into the ocean is expected to double by 2025...Do not let this be our legacy to the next generation!
